

Pichia pastoris Protein Expression Excellence

UNLOCK PICHIA boosting Pichia Glycoswitch® ENHANCED GLYCOPROTEIN PRODUCTION

VALIDOGEN's powerful yield enhancing *Pichia pastoris* expression platform known as UNLOCK PICHIA and Pichia GlycoSwitch® - an expression system for the production of glycoproteins with human-like glycosylation patterns - are available as a package unique from VALIDOGEN.

This unique combination of technologies acting synergistically results in a powerful platform for the production of recombinant glycoproteins with superior product yields and exclusively uniform GlcNAc₂Man₅- or other human-like glycoforms.

Key benefits

- Homogeneous, uniform glycoproteins
- Unrivalled production levels through VALIDOGEN's yield enhancing UNLOCK PICHIA technology
- Production of tailor-made glycoproteins
- Elimination of high-mannose glycosylation
